

```
#include<stdio.h>
#include<conio.h>
void main()
{
    void add(int num);
    int num;
    clrscr();
    printf("Enter the number:");
    scanf("%d",&num);
    add(num);
    getch();
}
void add(int num)
{
    if((num%2==0)
    {
        printf("Given number is even");
    }
    else
    {
        printf("Given number is odd");
    }
    getch();
}
```
